INDEX OF ABSTRACTS

Volume 8, 1961

(Number refers to page on which abstract begins.)

Abian, Smbat and Brown, A.B. Fixed points of continuous mappings into Euclidean n-space, 627; Fixed points and coverings under continuous mappings of a spherical shell, 628.

Accola, R. D. M. On gluing Riemann surfaces, 438; On a class of Riemann surfaces. Preliminary report, 438.

Afriat, S. N. On the system of inequalities $\lambda_r D_{rs} < \phi_s - \phi_r$, 339.

Ahlberg, J. H. and Nilson, E. N. Convergence properties of the spline fit, 440.

Al-Bassam, M. A. Holmgren Riesz (H-R) transform equations of Riemannian type, 274.

Al-Dhahir, M. W. An instrument in hyperbolic geometry, 157.

Alford, W. R. Some "nice" wild two spheres in three space, 348.

____ See Ball, B. J.

Allen, J. E. A generalization of convexity. Preliminary report, 344, 564.

Alling, N. L. A characterization of Abelian n_a-groups in terms of their natural valuation, 147; On exponentially closed fields, 159.

Almgren, F. J. Jr. The homotopy groups of the integral cycle groups, 615.

Alperin, J. L. Two p-group counterexamples, 160.

Alt, F. L. Pattern recognition by moments, 434.

Ames, W. F. and de la Cuesta, Hernando. Solutions of a class of linear partial differential equations with variable coefficients, 428.

Amir-Moez, A. R. Vertex points of functions, 339.

Andalafte, E. Z. See Blumenthal, L. M.

Anderson, D. R. On nested ordinal recursive functions and a subrecursive hierarchy, 587.

Anderson, F. W. On f-rings with the ascending chain condition, 257.

Andrews, J. J. An example of a nonmanifold whose product with the line is 4-space, 564.

Andrushkiw, J. W. On the extension of an ordered ring without identity, 143.

Appel, Kenneth, Hall, Marshall Jr., and Thompson, John. A search for simple groups of odd order, 364.

Appling, W. D. L. Concerning path length. Preliminary report, 278; A characterization of a certain function set. Preliminary report, 354; Interval functions and finite dimensional inner product spaces. Preliminary report, 361; Concerning non-negative valued interval functions. Preliminary report, 441; Hellinger integrals and absolute continuity. Preliminary report, 448; Interval functions and the Hellinger integral. Preliminary report, 611.

Armentrout, Steve and Martin, Joseph. Conditionally compact sets in normal spaces, 335.

Armijo, Larry. An integral representation theorem for functions convex with respect to a pair of functions, 602.

Aronson, D. G. On the stability of certain systems of parabolic difference equations, 591.

Atkinson, F. V. On a linear functional equation, 240.

Aumann, R. J. Utility theory without the completeness axiom, 257.

Aumann, R. J. and Maschler, M. An equilibrium theory for n-person cooperative games. Preliminary report, 261.

Auslander, Joseph. Endomorphisms of minimal sets. Preliminary report, 596.

____ See Seibert, Peter.

Auslander, Louis and Hahn, Frank. Flows on certain solvmanifolds not of type E, 438.

Austin, C. W. Duality theorems for semigroups, 359.

Backus, John. Representative sets and an orthogonality relation for certain families of sets, 250.

Bagemihl, Frederick. A proposition of elementary plane geometry that implies the continuum hypothesis, 55; Some identity and uniqueness theorems for normal meromorphic functions, 55.

Bailey, P. B. Removal of the log factor in the asymptotic estimates of the membrane eigenvalues, 248.

Ball, B. J. Finite collections of 2-spheres in E^3, 55.

Ball, B. J. and Alford, W. R. Some almost polyhedral wild arcs, 608.

Barrett, J. H. Conjugate points and separation theorems for general self-adjoint fourth-order differential equations, 505.

Batschelet, Edward. Testing hypotheses in human genetics. Preliminary report, 140.

Baumslag, Gilbert. On a theorem of Mal'cev 432.

Baxter, G. E. On the asymptotic behavior of Toeplitz determinants, 56; On the asymptotic behavior of Toeplitz determinants. II, 174; A norm inequality for a "finite-section" Wiener-Hopf equation, 439.

Bazer, J. and Hochstadt, H. Diffraction of scalar waves by a circular aperture in a planar screen, 176.

Bazley, Norman and Fox, David. A procedure for obtaining lower bounds to eigenvalues, 151.

Bean, R. J. On subsets of a disk which contain all the wild points of the disk, 577.

Bell, C. B. The Kramer-Gebelein maximal correlation as a measure of common entropy, 245; On the structure of Markov chains, 565.

Bellar, F. J. Jr. Pointwise bounds for the solution of parabolic differential equations. Part I, 50; Pointwise bounds for the sdution of parabolic differential equations. Part II, 148.

Beneš, V. E. A nonlinear integral equation from the theory of servomechanisms, 50; Ultimately periodic solutions to a nonlinear integro-differential equation, 142.

Berberian, S. K. Approximate proper vectors, 157.

Bergman, Stefan. Bounds for functions of two complex variables in a domain with a distinguished boundary set, 358.

Bergman, Stefan and Bojanic, Ranko. Application of integral operators to the theory of differential equations of mixed type. I, 365; Application of integral operators to the theory of differential equations of mixed type. II, 365.

Berri, M. P. Some properties of minimal topological spaces, 575.

_____ See Sorgenfrey, R. H.

Berryman, L. L., Latimer, J. F., Merkel, R. B. and Tamura, T. On the direct product of certain groupoids, 170.

Bierstedt, R. On the existence of a bound for a pair of consecutive quartic residues modulo a prime, 174.

Billings, J. H. Product integral solutions of linear, nonhomogeneous systems of first order differential equations, 141, 371.

Bilodeau, G. G. Increasing rates of convergence with summability methods, 426; The summability of series of Hermite polynomials, 591.

Bilyeu, R. G. Perturbation of a one-parameter family of autonomous differential equations, 159.

Bing, Kurt. A theorem on partially ordered sets. Preliminary report, 427.

Bing, R. H. Embedding circle like continua in the plane, 56; Almost cartesian product neighborhoods of 2-spheres, 162.

Blake, R. G. Positive and negative elements in partially ordered additive nygroups without identity. Preliminary report, 501.

Blattner, R. J. Infinitesimally induced representations, 170.

Blau, J. H. Transformation of probabilities, 141.

Bleicher, M. N. Some theorems on vector spaces and the axiom of choice, 514; Lattice coverings of n-dimensional euclidean space by spheres, 604.

Blumenson, L. E. and Miller, K. S. Properties of generalized Rayleigh processes. Preliminary report, 370.

Blumenthal, L. M. and Andalafte, E. Z. Metric characterizations of Banach and euclidean spaces, 56.

Blumenthal, L. M. and Freese, R. W. Ptolemaic metric spaces, 57.

Blumenthal, R. M. and Getoor, R. K. The Hausdorff-Besicovitch dimension of the zeros of a symmetric stable process, 168; The Hausdorff-Besicovitch dimension of the graph of a symmetric stable process, 261; Markov processes equivalent under a change of time, 593.

Boehme, T. K. Concerning the finite convolution, 239; Transformations which commute with convolution, 565.

Boen, J. R. On p-groups whose automorphism groups have maximal simple transitivity. Preliminary report, 242.

Bojanic, Ranko. See Bergman, Stefan.

Bonnice, W. E. A generalization of a theorem of Carathéodory, 252.

de Boor, Carl, Bicubic "spline" interpolation, 162.

Bose, R. C. and Chakravarti, I. M. Binary group codes with even redundancy which correct consecutive errors in bursts of three or less, 146.

Boudreau, P. E. See Kac, Mark.

Boyd, J. R. Axioms that define semi-metric, Moore and metric spaces. Preliminary report, 57.

Brace, J. W. Convergence on filters, 577.

Bradley, R. A. and Katti, S. K. Optimal scaling for ordered categories, 504.

Bramble, J. H. and Payne, L. E. A new decomposition formula in the theory of elasticity, 177; An analogue of the spherical harmonics for the

equations of elasticity, 177; Mean value inequalities for uniformly elliptic operators, 517; Some a priori bounds for uniformly elliptic operators, 517; Some integral inequalities for uniformly elliptic operators, 616.

de Branges, Louis. The existence of entire functions of zero type bounded on a sequence of real points, 429.

Brannen, J. P. Concerning Hausdorff transformations and absolutely convergent sequences. Preliminary report, 619.

Brauer, A. T. A new proof of theorems of Perron and Frobenius on non-negative matrices, II, 430.

Brauer, F. G. Asymptotic equivalence of differential equations, 163; On first order differential equations, 574.

Brauer, G. U. Convolution of sequences, 573.

Braunschweiger, C. C. An extension of the non-homogeneous Farkas theorem, 573.

Brenner, J. L. Roots and vectors of Mahler matrices, 166, 280.

Brieskorn, E. A theorem on the complex projective quadric, 268.

Briggs, W. E. The irrationality of gamma or of sets of similar constants, 249.

Browder, Andrew and Wermer, John. Function algebras on an arc, 614.

Browder, William. Remark on the Poincaré duality theorem, 433.

Brown, A. B. Extensions of the Brouwer fixed point theorem, 368.

____ See Abian, Smbat.

Brown, D. R. Topological semigroups in inverse limit spaces, 564.

Brown, J. R. The characterization of vector-valued Fourier-Stieltjes transforms, 258; The fundamental operator of a stationary Markov process. Preliminary report, 434.

Brown, M. and Cassler, B. On the representation of a manifold as a singular cell, 601.

Brown, R. K. Univalence and disconjugacy of the complex plane, 54.

Brown, T. A. Maximal simple paths on convex polyhedra, 53.

Brownell, F. H. Finite dimensionality of the Schrödinger operator bottom, 167; Perturbation theory and an atomic transition model, 442.

Brunk, H. D. On regression, projection, and conditional expectation. Preliminary report, 604.

Büchi, J. R. Turing machines and the Entscheidungs-problem, 354; On validity in finite domains, 354.

Buehler, R. J. New proofs and generalization of an optimum-gradient theorem, 358.

Burgess, C. E. Continua which have width zero, 342.

Burlak, J. On the solution of certain dual integral equations, 596.

Butler, J. B. Jr. On the scattering of waves in the infinite bar. Preliminary report, 247; On the perturbation method for determining coupled bending and twisting motion of a vibrating bar on an elastic foundation, 441.

Butson, A. T. A note on the construction of maximal codes with specified minimum distance, 501; Relative difference sets, 603.

Cairns, S. S. The Schoenflies theorem for polyhedral spheres, 57; A simple method for subdividing smooth manifolds, 157.

Caldwell, W. V. Vector spaces of harmonic mappings, 144.

Cameron, R. H. Note on analytic continuation of functions of two variables, 435.

Cantrell, J. C. Some embeddings of S^{n-1} in S^n, 502.

Cantrell, J. C. and Edwards, C. H. Jr. Almost locally polyhedral curves in E^n, 571.

Cantwell, J. C. An analog of the Stone-Weierstrass theorem and application, 499.

Cargo, G. T. A theorem concerning plane point sets with an application to function theory, 154; Radial and angular limits of meromorphic functions, 348.

Carlitz, Leonard. Binomial coefficients in an algebraic number field, 622; Summation of some series of Bessel functions, 623; The coefficients in the expansion of certain products, 623; An interpolation problem, 623; Generating functions for powers of certain sequences of integers, 623; Some arithmetic properties of a special sequence of polynomials in the Gaussian field, 626.

Carroll, F. W. and Kemperman, J. H. B. Metric results for noncontinuable analytic functions, 163.

Carroll, R. W. Some degenerate Cauchy problems with operator coefficients, 362; Some singular quasi-linear Cauchy problems, 618.

Cassler, B. See Brown, M.

Cayford, A. H. Entire functions which, together with all of their derivatives, assume Gaussian integer value on a finite point set, 333.

Chacon, R. V. Convergence of operator averages,

431.

Chakravarti, I. M. See Bose, R. C.

Chang, C. C. Theory of models of infinite valued logic. I, 68; Theory of models of infinite valued logic. II, 68; Theory of models of infinite valued logic. III, 68; Theory of models of infinite valued logic. IV, 141.

Chang, C. C. and Horn, Alfred. On the representation of α-complete lattices, 443.

Chang, C. C. and Keisler, H. J. Pairs of cardinals for models of a given theory, 275.

Chao, Chong-Yun. The existence of uncountably many nonisomorphic nilpotent Lie algebras, 175.

Cheema, M. S. and Motzkin, T. S. Vector partitions and permutation vectors, 167.

Cheney, E. W. and Loeb, H. L. On rational Tchebycheff approximation. Preliminary report, 427.

Chowla, Paromita. On the existence of polynomials of arbitrary degree in many variables, which represent every natural number exactly once, 50.

Chowla, S. and Davenport, H. On Weyl's inequality and Waring's theorem problem for cubes, 50.

Church, P. T. Boundary images of meromorphic functions. II, 348.

Church, P. T. and Mahowald, M. E. Measure preserving functions on locally compact spaces, 587.

Civin, Paul. Extensions of homomorphisms, 53.

Clay, J. P. Proximity relations in transformation groups, 603.

Clements, G. F. Entropies and nth widths of several sets of functions. Preliminary report, 568.

Coburn, Nathaniel. Discontinuity relations for charged, compressible, relativistic, fluids (with self induction), 266; The Cauchy problem and entropy in charged, compressible, relativistic fluids (with self-induction), 370; The limiting speeds of characteristics in relaxation hydrodynamics, 449.

Cohen, Eckford. Simultaneous binary compositions involving pairs of relatively k-free integers, 54; Additive representations of pairs of integers with prime and square-free summands, 69; Arithmetical notes. VII. Some classes of even functions (mod r), 178; Some asymptotic formulas in the theory of numbers, 273; On the distribution of certain sequence integers, 277; Arithmetical notes. VIII. On the density of a special set of integers, 356; On the combinatorial arithmetic of cyclic vector spaces over a Galois field, 361; A corollary of the Goldbach conjecture, 363; Mean values of functions on polynomial domains of prime characteristics, 370; Note on a class of affine transformations, 440; On the set of integers representable as a product of a prime and a square, 442; A generalization of Axer's theorem and some of its applications, 449; On the mean parity of arithmetical functions, 449; Some analogues of certain arithmetical functions, 615.

Cohen, Haskell and Koch, R. J. Some acyclic semigroups, 352.

Cohen, L. J. The roots of polynomial surfaces, 428.

Cohn, Harvey. Cusp functions involved in decomposition into the sum of four squares in $R(3^{1/2})$. Preliminary report, 55.

Cohn, P. M. Factorization in noncommutative power series rings, 587.

Coleman, D. B. A theorem on finite group algebras, 605.

Collins, H. S. The kernel of a semigroup of measures, 277; Remark on affine semigroups, 349.

Comfort, W. W. and Gordon, Hugh. Vitali's theorem for invariant measures, 53.

Conner, H. E. Limiting theorems for a position-dependent branching process, 256.

Conner, P. E. and Floyd, E. E. Fixed point sets of differentiable involutions, 176; Cobordism classes of maps of odd prime period, 265; Fixed point sets of maps of odd prime period, 266; The computation of bordism groups, 267; Fixed point sets of differentiable involutions, II, 361; An extension of Borsuk-Ulam mapping theorem, 444; Actions of elementary abelian p-groups, 445.

Connor, F. F. See Porcelli, P.
